

ELOQUENT LITTLE ONES™

We understand the skill gaps in early learners and aim to offer courses to bridge them. This is crucial for your children's development and social adjustments in the future.

SOME OF THE SKILL GAPS ARE:

- Hesitancy to mix around with other children and interact with elders.
- Inability to communicate their needs and problems with caregivers.
- Struggle with articulating speech sounds and keywords in the language.
- Social awkwardness when working in groups & making friends.
- Inability to tap into their inherent creativity.
- Lack of attention span and focus.
- Overuse of technology potentially stunts cognitive development and may cause attention deficit.

Statistically, 7 out of 10 young children lack some of these basic developmental skills.

So we've specially designed a ONE-STOP solution to help them develop into socially well-adjusted adults!

Our solution is planned for holistic communication development, a strategy that translates LEARNING IN ACTION!

True learning leads to corrective action, not mere knowledge! Therefore, we go beyond traditional teaching methods!

Our mantra is profoundly simple- Learning by DOING!

OUR STRATEGY INCLUDES:

An interactive digitalized programme.

Experiential language learning exercises.

Collaborative activities.

Meaningful communication-based assignments.

Empathy and sociocultural connect.

The 4C's have been a proven way to enhance development and make children ready for the world.

CREATIVITY

Thinking outside the box, innovative approach and the ability to try new things.

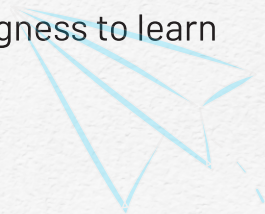

COLLABORATION

The ability to recognise the power of teamwork and function within a group or team to achieve a goal.

CRITICAL THINKING

Developing an independent thought process, willingness to learn from different sources and new experiences.

COMMUNICATION

The ability to express ideas, opinions, emotions, strategies and solutions eloquently and in the proper context.

These skills not only boost a child's academic abilities but prepare them for healthy social and cultural adjustment in their formative years. Also, these skills are now a mandate of the National Education Policy rolled out by the Ministry of Education in July 2020.

An early start helps children seamlessly transition the developmental milestones to lead a quality life in the future.

Both in personal and professional spheres.

OUR PROGRAMME ENABLES CHILDREN TO:

- Narrate stories through pictures
- Use related vocabulary
- Pronounce words correctly
- Apply grammar appropriately
- Perform songs, poetries and stories
- Work in collaboration with peers
- Handle separation anxiety in school
- Model empathetic behaviour
- Leverage in-built creativity for learning purposes.

THE BENEFITS OF THIS PROGRAM INCLUDE:

- To be comfortable with language and communication.
- Becomes linguistically expressive at a very early age
- Understands the effective use of language
- Witnesses a boost in their social, cultural and economic growth
- Becomes eligible to opt for Trinity College, London Exams on completing the program.

Every child is unique and we want our courses to be a good fit for each of them. To attain a quick diagnosis of which program is best suited to your child's specific needs, contact us at **+919819385256** or write to us at **admin@4cfteduskills.com**
