

ELOQUENT YOUNGSTERS™

www.4cfteduskills.com

Welcome to 4CFT EduSkills

Where we enable your future by Impacting skills education using technology for a better quality of life.

ABOUT 4CFT EDUSKILLS™

4CFT EduSkills LLP is a start-up creating an innovative approach to skills education. We are a digital training and assessment platform for life and career skills. Our focus is on bridging the skills gap between educational institutions and job markets through web-based courses. 4CFT EduSkills is wholly devoted to the goal of enabling people to explore their full potential, thus, empowering them to enrich their future.

Our courses are curated on the 4Cs of the 21st Century Skills: Creativity, Critical Thinking, Communication, and Collaboration. At the onset of our innovative journey, we will primarily approach schools, colleges and educational institutions as partners to reach out to a larger target audience who need to be 21st century ready in life skills for work and society.

The aim of our courses is to help build the future of the world, and your role will be vital in achieving these ambitions. The backbone of the company lies in its vision and mission, which are as follows:

VISION

Enabling young people to be independent thinkers and equipping them with the necessary skills for a better quality of life.

MISSION

Provide universal access to quality training through the digital platform, in work and life skills, in a graded manner by the best tutors in the field of education and business.

Roughly 1.8 million children experience long-term communication difficulties. Why should your child be a part of this grim statistic?

Therefore, we take a hands-on approach to your child's development, by equipping them with the 4Cs of the 21st Century, that effectively deals with several skill-gaps including:

- Feeling tongue-tied when expressing ideas or opinions.
- Shyness and timidity when communicating without adult intervention.
- Struggle with articulating speech sounds & key words in language.
- Hesitancy to work in teams with other children or interact with elders.
- Social awkwardness in collaborative activities & forging relationships with peers/elders.
- Uncertainty with voicing emotions and feelings like fear, pain, desire, disappointment, etc.
- Lack of attention span and focus.
- Over-use of technology that potentially stunts cognitive development.
- Inability to tap into their inherent creativity.

A ONE-STOP solution that addresses these skill-gaps can potentially transform under-confident young children into socially well-adjusted adults! That's where we come in....

Our solution is planned for holistic communication development, a strategy that translates **LEARNING IN ACTION!**

True learning leads to corrective action, not mere knowledge! Therefore, we go beyond traditional teaching methods!

Our mantra is profoundly simple- Learning by **DOING!!!**

Because that's proven to be the BEST way to **LEARN!**

OUR STRATEGY INCLUDES

- **An interactive digitalized programme**
- **Experiential language learning exercises**
- **Collaborative activities**
- **Meaningful communication-based assignments**
- **Empathy and sociocultural connect**
- **Integrating study from English literature, history, etc.**

Our approach rests on the foundation of the 4Cs of the 21st century- Communication, Collaboration, Creativity, and Critical thinking, a mandate of the National Education Policy rolled out by the Ministry of Education in July 2020. Most importantly, it is designed to boost a child's academic, social and cultural growth in their formative years. As we align our programs with the NEP, our learners get school-ready, and job-ready, and become socially well-adjusted. An early start is the best start, isn't it?

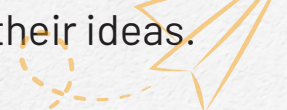

OUR PROGRAM ENABLES CHILDREN TO

- Engage in group discussions.
- Use age and situation-related vocabulary.
- Pronounce words correctly.
- Apply grammar appropriately.
- Dramatize text through plays, prose, and poetries.
- Work in collaboration with peers.
- Become comfortable with vocalizing emotions.
- Model empathetic behavior.
- Leverage in-built creativity for learning purposes.

This course lays the foundation for a child's overall development and success in life as they:

- Become competent at communicating and articulating their ideas.
 - Transform into a linguistically expressive individual.
 - Learn to become task-independent and emotionally strong.
 - Understand the effective use of language.
 - Witness a boost in their social, cultural, and academic growth.
 - Become eligible to opt for Trinity College's Communication Skills Exams upon completing the programme.
- 

We recommend you make the quick and best decision for your children and equip them with developmental skills that will stick with them for life!
